

## Lower Primary School

Lower Primary School

Green Day Goals

We are planning a day to increase our dear student's environmental awareness which will take place on Saturday, October 28th 2023.

Our dear students will be asked to come dressed in green T-shirts with the school pants.

- Primary 1 students are encouraged to bring something green to eat like cucumbers, green apples, grapes, etc... They will learn different vocabulary about healthy green food.

- Primary 2 students are encouraged to search the net, use the "information bank" and get information to share with other students in class (research papers).

- We emphasize the idea of recycling therefore Primary 3 students are encouraged to come up with ideas of recycling or search for the recycle sign on different products and present them in class.

- All students have the opportunity to cultivate some plants as an activity, they take turns to water them on daily basis to create the sense of caring for plants and the environment .So students can bring (seeds, cotton, and plastic cups) to use in the activity.
